Work Experience

Target

Minneapolis, MN

Engineer

October 2024 – Present

- Designed and built Target's largest Elasticsearch hybrid search system using LangChain, enabling natural language search across **2.5M** Data Catalog assets and unlocking GenAI readiness
- Helped build AI agentic tooling connecting OTEL logs and infrastructure metrics for the TAP SRE team, enabling automated RCA in **~6 minutes** during incident triages
- Re-architected an ingestion pipeline through **350+** experiments, achieving a **98.58%** reduction in processing time using smart multi-processing and token management techniques
- Co-developed a Kafka-based App Monitoring pipeline that continuously evaluates live AI responses
- Diagnosed and resolved concurrency bugs in the LLM Evaluation Service causing **98.4%** failure at 1,000 concurrent users achieving a **92% latency reduction** in synthetic data generation downstream and **76.66% latency reduction** and **100% stability improvement** for the LLM Evaluation service
- Designed and delivered a GenAI based Synthetic Data Generation service for apps facing data issues
- Optimized prompts for LLM-as-a-Judge evaluation service **speeding up evaluation by twofold**
- Led the creation of a documentation site and authored high-priority guides reducing time-to-first success for teams new to GenAI accelerating platform adoption
- Mentored 4 interns across 2024–2025 (3 Target Tech engineers + 1 Genesys Works high schooler)

TLP Engineer

September 2023 - October 2024

- Responsible for production support of VMs running barcode OCR in distribution center
- Automated metrics aggregation to achieve a **95% latency reduction** w/ optimized SQL queries
- Gained experience in integrations to codebases using GPT, Llama2, and Mixtral models

Best Buy

Minneapolis, MN

Junior Engineer

August 2022 – May 2023

- Developed front-end using React JS for a new mobile activations flow for the dot com team.
- Helped to migrate over the old CRM tooling to newer Microsoft based software for Best Buy Health
- Gained insight into the industry utilization of Microsoft Dynamics 365 and Power Platform
- Labeled internally as an intern but worked in the capacity of a junior engineer

Relevant Previous Experiences

- Target, Software Development Intern – Infrastructure (2022)
- Target, Back-End Software Development Intern – Mobile App (2021)
- University of Minnesota, Undergrad Teaching Assistant (2021)
- The Toro Company, Inventory Analyst Intern (2020)
- Optum, Full-Stack Software Development Intern (2019)

Education

Georgia Institute of Technology

Atlanta, GA

M.S. Computer Science

Expected Graduation: August 2026

Specialization in Artificial Intelligence

Computer Vision Research through HAAG

University of Minnesota

Minneapolis, MN

B.A. Mathematics

December 2024

Thesis Paper: Solving Ill-Posed Inverse Problems with Computerized Reconstruction Approaches

B.S. Computer Science

May 2023

Dean's List Recipient

Oxford University

Oxford, U.K.

Artificial Intelligence Certificate Program

May 2024

Skills

- Languages: English (Fluent), Hindi (Fluent), Telugu (Fluent), French (Gold Bilingual State Seal), Japanese (N4)
